Hasil Tampilan:

The screenshot shows the CarrerGo application interface. On the left is a dark blue sidebar with the CarrerGo logo and three menu items: 'Dashboard' (home icon), 'Lowongan Kerja' (briefcase icon, highlighted), and 'Profil' (user icon). The main content area has a light blue header with a search bar containing 'Cari Lowongan, posisi, atau perusahaan', a notification bell, and a user profile 'Rahman'. Below the header is the 'Tambah Lowongan' form. The form has several input fields: 'Posisi' with 'cth: Data Analyst', 'Perusahaan' with 'cth: PT. Nusantara Digital', 'Lokasi' with 'cth: Jakarta', 'Gaji Minimum (Rp)' with '6000000', 'Gaji Maksimum (Rp)' with '8000000', 'Jenis' with a dropdown set to 'Full Time', and 'Kategori' with a dropdown set to 'IT & Software'. At the bottom right of the form are 'Batal' and 'Simpan' buttons.

Analisa:

Berdasarkan praktikum yang telah dilakukan, dapat dianalisis bahwa pembuatan *website* CarrerGo menggunakan HTML dan CSS telah menerapkan struktur dasar pengembangan antarmuka web. HTML digunakan untuk membangun struktur dan isi halaman, sedangkan CSS digunakan untuk mengatur tampilan, tata letak, warna, ukuran, serta responsivitas halaman.

Pada praktikum ini dibuat beberapa halaman yang saling terhubung, yaitu halaman utama (*index.html*), halaman login, halaman pendaftaran, dashboard, halaman lowongan kerja, dan halaman profil. Setiap halaman memiliki fungsi yang berbeda tetapi tetap menggunakan konsep desain yang sama sehingga menghasilkan tampilan yang konsisten. Penggunaan file *style.css* sebagai *stylesheet* utama juga membuat pengaturan tampilan dapat diterapkan secara terpusat pada berbagai halaman.

Dari sisi desain, website menggunakan kombinasi warna biru, putih, dan abu-abu. Warna biru digunakan sebagai warna utama untuk tombol, ikon, navigasi aktif, dan beberapa elemen penting. Penggunaan komponen seperti tombol, input form, kartu lowongan, sidebar, serta navigasi membuat tampilan website lebih terstruktur dan mudah dipahami.

CSS yang dibuat juga telah menerapkan beberapa fitur seperti efek *hover* pada tombol dan kartu, perubahan tampilan ketika input dipilih, penggunaan *grid* dan *flexbox* untuk mengatur *layout*, serta *media query* untuk menyesuaikan tampilan pada ukuran layar yang lebih kecil. Dengan adanya responsive design tersebut, tampilan website dapat menyesuaikan perangkat desktop maupun perangkat dengan ukuran layar yang lebih kecil.

Pada halaman *login* dan *register*, penggunaan *form input* dan validasi tampilan memberikan pengalaman interaksi yang lebih baik kepada pengguna. Sementara itu, *dashboard* menyediakan informasi seperti jumlah lowongan tersaring, lamaran aktif, rekomendasi, lowongan baru, dan kategori pekerjaan sehingga pengguna dapat melihat informasi utama secara lebih terorganisir.

Secara keseluruhan, praktikum ini menunjukkan bahwa HTML dan CSS dapat digunakan secara bersama-sama untuk membangun sebuah antarmuka website yang memiliki struktur, tampilan, navigasi, dan responsivitas yang baik.

Pembuatan *website* CarrerGo juga menunjukkan penerapan konsep CSS seperti variabel warna, *flexbox*, *grid*, *pseudo-class*, *positioning*, serta *media query* dalam sebuah proyek *website*.
